ALLISON TRANSMISSION FLUID SPECIFICATION CHANGES

Description:

This TSI Letter applies to all models (bus, truck or stripped chassis) that can be ordered with an Allison transmission. There is a change in fluid specifications for certain Allison Transmission product families regardless of the model truck or bus it is installed in. The Donax TG fluid that Shell is currently supplying to our assembly plants meets the new Allison TES-389 spec. The current Donax TG fluid will be renamed to Donax TA-389. Dexron III is no longer available as of 01/01/2007 due to a licensing agreement. Refer to attached Allison document for product compatibility.

Notice:

The information supplied herein has been furnished by the manufacturer and/or the supplier for use with its product. International Truck and Engine Corporation reprints this information based on representations made to the company. While users are urged to carefully follow the instructions accompanying the product, International cannot accept any responsibility for user errors, or mishaps resulting from such errors, or from any misuse of the product.

Introduction of New Fluid Specification TES-389

General Motors will no longer license DEXRON-III Automatic Transmission Fluids after December 31, 2006. General Motors is currently working with the oil and additives industry to replace DEXRON-III fluids with DEXRON-VI fluids.

Allison Transmission has created a new transmission fluid specification, "Schedule 1 TES-389." The Allison specification gives original equipment manufacturers another approved fluid choice in addition to TES and TranSynd. Approved Schedule 1 TES-389 fluids may be viewed as direct replacements for the obsolete DEXRON III fluids.

DEXRON-VI fluids and Allison approved Schedule 1 TES-389 fluids should be available on January 1, 2007.

In order to be completely compatible with DEXRON-VI fluids, Allison transmission seal and O-ring mater are being changed. Allison 1000, 2000, 3000, and 4000 Product Families transmissions will have a serial number breakpoint established for the approval use of DEXRON-VI. DEXRON-VI compatible 1000 and 2000 Product Families transmissions are currently available. DEXRON-VI compatible 3000 and 4000 Product Families transmissions will be available after February 1, 2007. Serial number breakpoint information will be communicated in a future Service Information Letter from Allison Transmission. DEXRON-VI usage in units manufactured to these breakpoints is strictly prohibited by Allison Transmission. DEXRON-III or Allison approved Scheduled TES-389 fluids are suitable for use in all 1000/2000 and 3000/4000 Product Families, regardless or serial number manufacturing date.

Schedule 1 TES-389 and DEXRON-VI fluids will have the same fluid change intervals and will be the same: current DEXRON-III change intervals. This information will be further detailed in a future Allison update of Service Information Letter 10-TR-99 (Transmission Fluid/Filter Change Recommendations).

TES-295 fluids, including Allison Transmission TranSynd, will continue to be available, and fluid change intervals will remain unchanged.

Please contact your Allison Sales Representative if you have any questions.

JOIN OUR MONTHLY E-FLYER

Hoglund Bus & Truck is now offering our monthly newsletter through e-mail. Call 763-271-2959 or e-mail marketing@hoglundbus.com and join our e-flyer list to begin receiving our monthly school bus flyer and other great offers via e-mail.

SERVICE SUPERVISOR – BRANDON ROST

We are pleased to announce that Brandon Rost has accepted the position of Iowa Service Supervisor. Brandon has a bachelor's degree from University of Northern Iowa and brings with him solid managerial skills.

Brandon started as a Service Advisor at Sears Automotive. He progressed through the management program at Enterprise Rent-a-Car and recently was the Branch Manager for USA Staffing in Marshalltown.

In his spare time, Brandon enjoys working on cars.

We are excited to welcome Brandon to the Hoglund Team!

ISIS WEB SITE: THE WEB TOOL FOR THE GARAGE

The Bus ISIS Web site from IC Corporation is a tool for bus owners and technicians that provides complete and up-to-the-minute services information about chassis, bodies and engines in one centralized location. With internet access and the Bus ISIS subscription, service technicians are a click away from a single repository of mountains of technical service information. Registration is required through IC Corporation dealers or visit www.ic-corp.com.
